All-in-one

+ System integration

+ Support

Outstanding implementation speed

Business Apps creation takes days and weeks instead of months and years

Comprehensive seamless solution

All ELMA apps operate as a single system without the need for integration

Easy start

Simple interface, rich opportunities for development.

Provides a comprehensive solution for business challenges. Accessible tool for a fast and cost-efficient digital transformation. Easy maintenance.

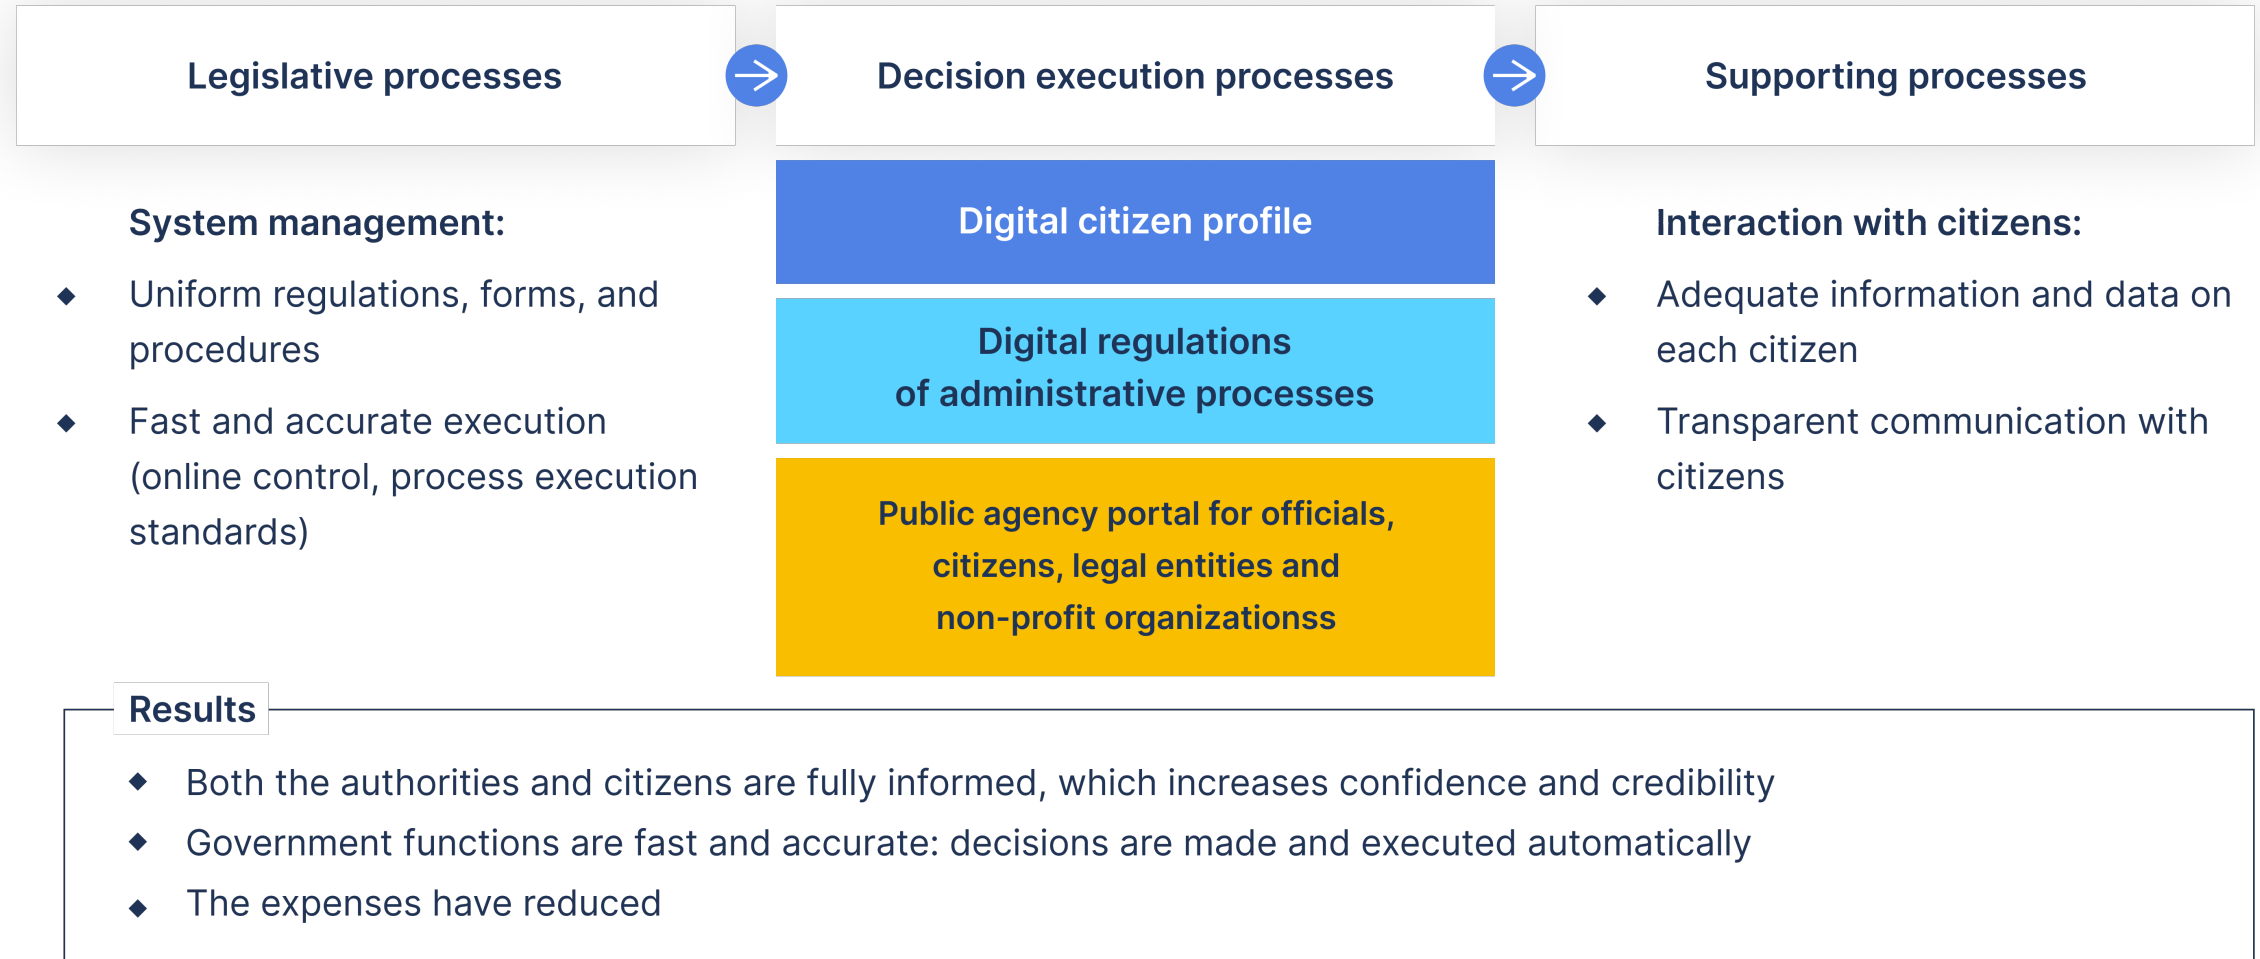

ELMA for Public Sector

We have created a high-load cloud system for public services from scratch. It handles **1 million transactions** per hour.

The system is implemented in **13 regions or Russia** and is used by **5700 officials**, **425 departments**, and more than **10 million citizens**.

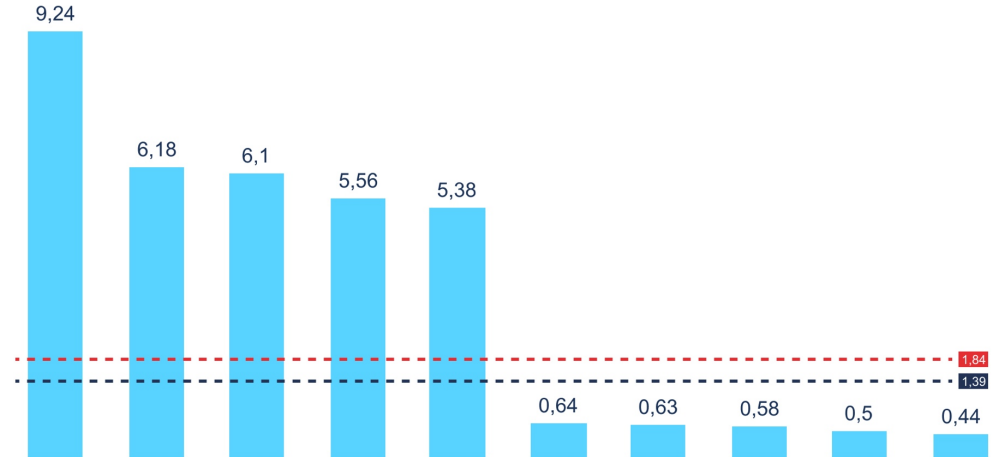

ELMA for Business

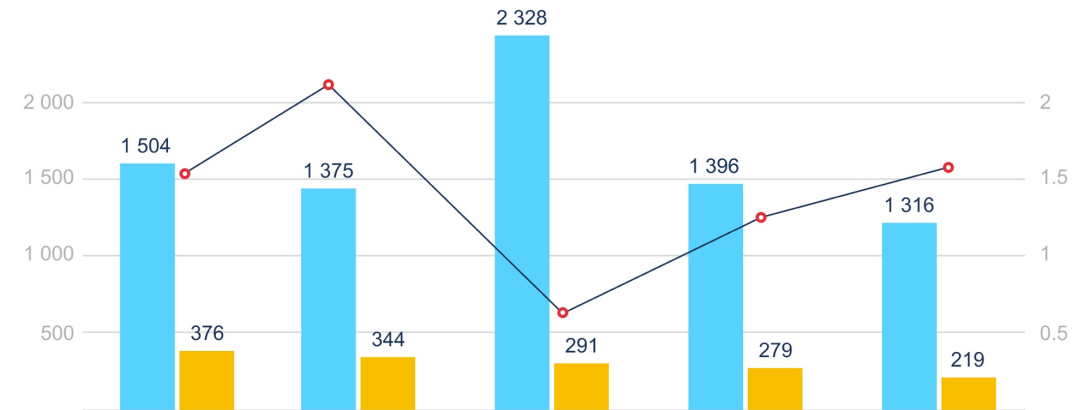

Changing the Kapital Bank business model with the ELMA platform ensured the bank's dominant position in the country's market.

The labor productivity has increased drastically due to automatic process adjustment, which is based on statistics. Results of the first 3 months of work:

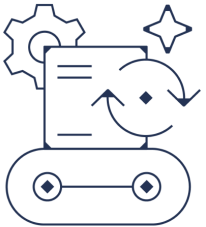

Analysis: price and quality comparison

- ➔ Opening a savings account has become **3 times faster** (from **45 to 15 minutes** per account)
- ➔ Dispersing a Loan has become **2 times faster** (from **60 to 30 minutes** per loan)
- ➔ Issuing a debit card has become **6 times faster** (from **30 to 5 minutes** per card)
- ➔ Opening a Current Account has become **4 times faster** (from **20 to 5 minutes** per account)

Technology

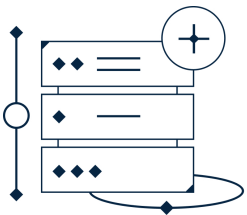

Microservice architecture

- Fault tolerance
- Easily scalable
- Easy to maintain in the enterprise (DevOps, low maintenance, independent environment)
- Easy access distribution for mobile, web, and system interaction

Private Cloud mode

- Creating streamlined processes that include several companies
- Database of reference processes and configurations
- Shared libraries and best practices
- Connecting new companies to the cloud takes minimum time

Multitenancy

- Isolated tenants for set up configurations and data
- Multi-tenant resource balance

**Advanced technology stacks that are sufficient right now
and have a potential for the future growth**
